**Subject:** RE: quarrying on farm Doornpoort

Dear Steven,

GA Environment apologies for a delay in providing you with a response. We are awaiting a response from the project engineers. Issues around blasting are indeed a concern, and all potential impacts that emanate from blasting activities on site will be assessed during the scoping phase of the project.

Kind Regards

 Kirthi Peramaul

**Subject:** quarrying on farm Doornpoort

Hi Kirthi

---

Our house is about 200 metres from the proposed quarry site. The use of explosives on the site will no doubt crack the foundations and walls of the dwellings around the quarry site. One cannot really compensate for this calamity as the financial and physical damage to the dwelling makes it obsolete – it becomes worthless.

In terms of environmental assessment, how does your department solve such a problem, where years of working to pay off a bond become worthless, as the property is damaged beyond repair by the explosives used as part of the quarrying process?

Regards,  
Steven

Dear Steven,

Thank you for providing GA Environment with your comments. You will be registered as an Interested and Affected Party and your contact details will be included on the Stakeholder database. Your comments have been noted, and will be captured in the Draft Scoping Report. The Draft Scoping report will be made available for public review. You will be notified of the review period as well as the availability of the Draft Report.

**Subject:** RE: Objection to quarrying of Farm Doornpoort

Hi Nkhensani

Would it not be more viable to decrease the toll fees on the N1 north from the Doornpoort plaza onwards so that more vehicles can make use of this national road, rather than spending billions on revamping the R573? The increased stream of cars on the N1 will make up for this deficit in toll fees, and then one could spend a fraction of the proposed budget to expand the on/off routes to Moloto and extended towns.

Regards,  
Steven

**Subject:** Objection to quarrying of Farm Doornpoort

Hi

I would like to object to the quarrying of Farm Doornpoort. Could you please send particulars as to how I may officially object.

Will there be blasting; use of explosives to facilitate the quarrying process?

What entrance and exit routes will the trucks travel to and from the quarry site?

What measures will be taken to prevent the spread of dust during the quarrying process, as well as during the transport of the materials via trucks?

Regards,  
Steven
