Subject: Draft Scoping Reports for the proposed SANRAL Quarry 6A & 6B

Dear Musa,

The Draft Scoping Reports for Quarry 6A & 6B were submitted to the DMRE on the 19th of November 2020. As haulage of material will be undertaken on an existing access road, this access road crosses an ephemeral wetland. GA Environment is thus required to include Activity 19 of listing notice 1 on the submission. Activity 19 includes the following:

“The infilling or depositing of any material of more than 10 cubic metres into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 10 cubic metres from a watercourse”

It is GA Environment’s understanding based on our telephonic conversation, that activity 19 will be included in the Final Scoping report that will be submitted to the Department in January 2021. A motivation (cover letter) will be submitted with the Final Scoping report detailing the inclusion of Activity 19. The public will be provided with an opportunity to comment on the additional listed activity during the circulation of the Draft EIR report.

Please confirm if GA Environment’s understanding is correct and thank you so much for taking the time to chat to me today.

Kind Regards

 Kirthi Peramaul
